

Uploading data to imicrobe/ivirus FTP

Ken Youens-Clark

Abstract

Both the iMicrobe (<http://imicrobe.us>) and iVirus (<http://ivirus.us>) sites accept user data via an FTP (file transfer protocol) site (<ftp://ftp.imicrobe.us>). These are instructions for connecting and transferring data to us for inclusion in our database, the iPlant Data Store, and public availability via our FTP site.

Protocol

Step 1.

Use an FTP program (e.g., "ftp" or "ncftp" on Unix, Putty on Windows) to connect to "ftp://ftp.imicrobe.us". Use "anonymous" for the username and your email address for the password.

Step 2.

After you login, go into the "incoming" directory ("cd incoming") and "put" your files.

Step 3.

Write "kyclark@email.arizona.edu" to inform what files were uploaded and what you would like done with them.
