ABSTRACT

 0  [M] 0 Mass Percent  0 °C  00:00:00

Protocol Repository and Exporting

Once protocols are created, they can be exported for use in other sciNote projects and/or copied directly to the sciNote Protocol Repository, where they are versioned and accessible to designated users.

Exporting a Protocol

Exporting a protocol saves it in a place of your choosing as a proprietary ".eln" file, which can be opened by sciNote. It is useful if you want to share it with other sciNote users specifically (the repository only allows you to designate access to either all other users or no other users), especially if they are not users of your particular sciNote app.

MATERIALS TEXT

Direktor družbe Sven Kukemelk je ob tem dejal, da se je vzdrževalna pogodba iztekala in da so različni ponudniki iz vse Evrope izkazali interes. Prejeli so pet ponudb, izbrali pa so Northern Aerotech, ki je, tako Kukemelk, ponudil celovito rešitev za vso floto.

"Adria ni več prevoznik, ki prevaža potnike iz Ljubljane v druga evropska mesta, ampak smo veliko večji," je ob tem dejal Kukemelk in dodal, da sodelujejo s številnimi letalskimi družbami, ki jim morajo zagotoviti ustrezne storitve.

"Adria je na dobri poti"

"Adria je danes na dobri poti, da postane močan regionalni prevoznik," je še dejal Kukemelk in dodal, da morajo imeti partnerja, ki spodbuja rast, saj se morajo pri rasti ozirati tudi na druge trge. "Upam, da nam boste Slovenci dali možnost in uporabljali naše storitve in videli, kako napredujemo in dvigamo kakovost storitev na visoko raven, na kateri so že nekaj časa."

SAFETY WARNINGS

Be very precise.

Protocol Repository and Exporting

Once protocols are created, they can be exported for use in other sciNote projects and/or copied directly to the sciNote Protocol Repository, where they are versioned and accessible to designated users.

Exporting a Protocol

Exporting a protocol saves it in a place of your choosing as a proprietary ".eln" file, which can be opened by sciNote. It is useful if you want to share it with other sciNote users specifically (the repository only allows you to designate access to either all other users or no other users), especially if they are not users of your particular sciNote app.
