### ABSTRACT

#### Phonological Short Term Memory tasks for Italian-English comparison

An attempt was made to develop tasks that would be comparable between the Italian (i.e., a consistent orthography) and English (i.e., an inconsistent orthography) versions.

*Phonological STM* was measured by a non-word repetition and a digit span tasks.

THIS PROTOCOL ACCOMPANIES THE FOLLOWING PUBLICATION

40. Marinelli, C.V., Zoccolotti, P., Romani, C. (in revision). The ability to learn new written words is modulated by language orthographic consistency. Plos One
