ABSTRACT

Wholemount Immunolabeling-Gut

This protocol is used for immunostaining large blocks of tissue. The application that it was developed for is large pieces of mouse gut tissue. Tissues should be well washed prior to fixation.

THIS PROTOCOL ACCOMPANIES THE FOLLOWING PUBLICATION

Development. 2011 Nov;138(21):4789-800. doi: 10.1242/dev.060053. Targeted deletion of Hand2 in enteric neural precursor cells affects its functions in neurogenesis, neurotransmitter specification and gangliogenesis, causing functional aganglionosis. Lei J1, Howard MJ.
