Guidelines

Materials needed: sharpened pencil, eraser, at least a 4 inch by 4 inch piece of unlined paper

Protocol

Step 1.

Begin by lightly drawing a small circle- about the size of your thumb.

Step 2.

On the top left side of the small circle, lightly draw on a small oval. The oval should begin in the circle and point out of the circle at about a 70-80 degree angle.

Step 3.

Repeat step 2, but mirrored onto the right side such that you end with 2 small ovals pointing out of the circle that are mirror images vertically of one another.

Step 4.

At the bottom of the small circle, lightly draw on another larger circle about 1.3 times the size of the smaller one.

Step 5.

Erase the bottom of the first small circle such that it is now only connected to the larger circle by 2 points.

Step 6.

Erase where the small ovals on either side of the first circle overlap with the first small circle.

Step 7.

Now that you have one outside line, go over all of the outside line with your pencil while making small curly flourishes- aka continually write w to achieve this.

Step 8.

In the middle of the original small circle, lightly draw in an isoscles trapezoid (the pizza hut logo shape)- make sure the edges are rounded though and not sharp!

Step 9.

On the bottom left and bottom right corners of the trapezoid, draw small circles to cover the points.

Step 10.

Inside the trapezoid, on the middle of the right half, draw and fill in an oval at 180 degrees.

Step 11.

Inside the trapezoid, on the middle of the left half, draw a small n, elongated on either side. Horizontally, this should line up with the top of the oval you just drew.

Step 12.

In the very center of the trapezoid vertically slightly under the n and oval, draw a small horizontal line. This should not touch the n nor the oval, and should be almost under both.
