Add to PATH

Bonnie Hurwitz

Abstract

Protocol

Step 1.

Go to your home directory

cmd COMMAND
```
cd
```

Step 2.

so you can see all of the programs we will use for this class you need to add our hurwitzlab bin directory to your unix PATH.

You will need to edit your .bashrc file in your home directory to include this directory in your PATH.

Add the following line to your .bashrc file:

PATH=/rsgrps/bhurwitz/hurwitzlab/bin:$PATH

cmd COMMAND
```
nano .bashrc
```

✛ NOTES
Bonnie Hurwitz 01 Sep 2016

To get out of nano quit using the menu at the bottom and save.

Or ^X (control X)

Step 3.

So you can use seqmagick, you will also need to add python to your .bashrc using nano. This time you add the following line:

export PYTHONPATH=/rsgrps/bhurwitz/hurwitzlab/lib/python

cmd COMMAND
```
nano .bashrc
```
