⅄ Reconstruction of simultaneous multislice imaging magnetic resonance data (example)

Klaus Eickel

Abstract

The provided data are example raw data acquired with simultaneous multislice imaging (SMS) in a preclinical MRI experiment.

zip includes:

- Matlab code (Main.m) and needed functions

- data arrays

Password needed to unzip: smsreconstructionexample

Guidelines

- documented example code in dataset -

Protocol

Reconstruction of simultaneous multislice imaging magnetic resonance data (example)

Step 1.

Abstract

The provided data are example raw data acquired with simultaneous multislice imaging (SMS) in a preclinical MRI experiment.

zip includes:

- Matlab code (Main.m) and needed functions

- data arrays

Password needed to unzip: smsreconstructionexample
