Create "abe487" Github repo Version 2

Ken Youens-Clark

Abstract
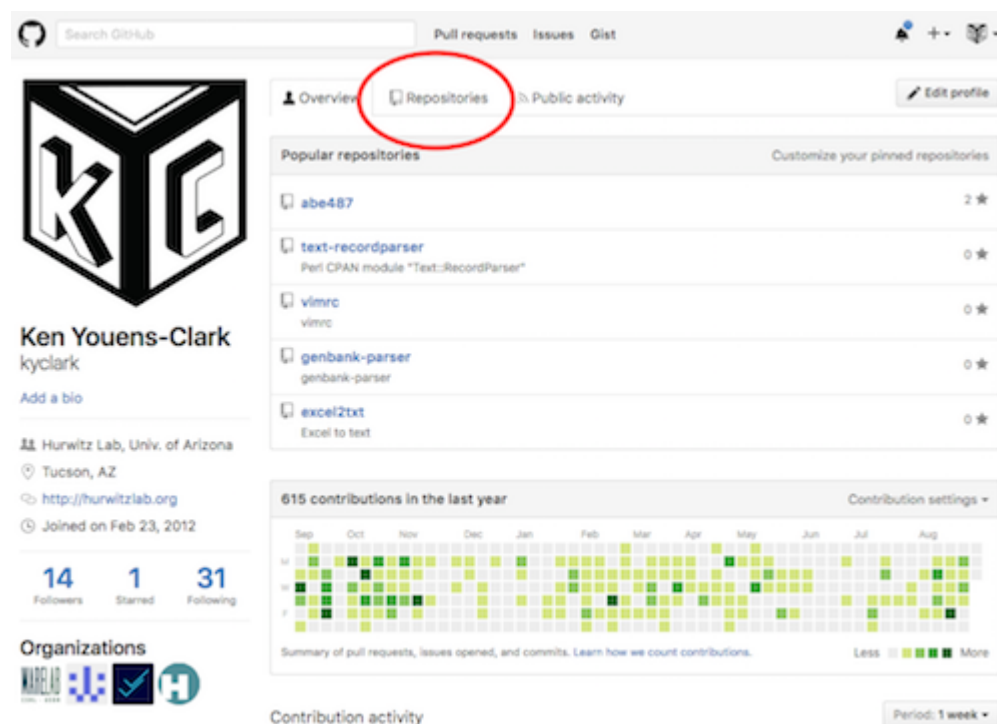

Protocol

Step 1.

Login to http://github.com

Step 2.

Click on "Repositories"

Step 3.

Click on "New"
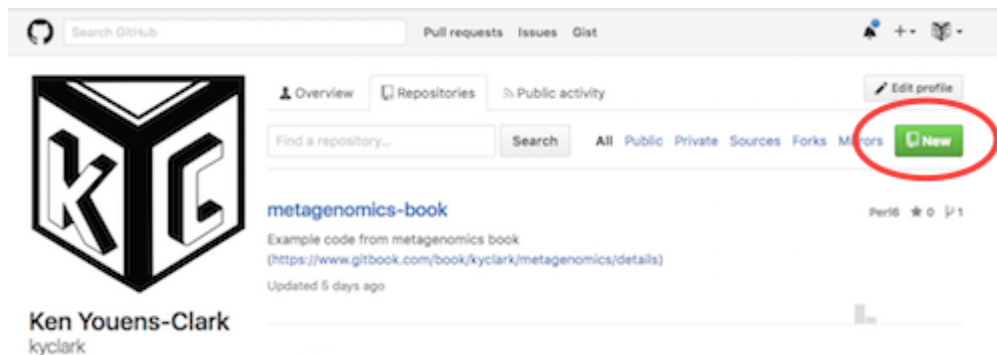

Step 4.

Enter "abe487" (lowercase, please) for the "Repository name".

Click "Initialize this repository with a README" so it won't be empty. If you don't do this, then remove it and recreate.
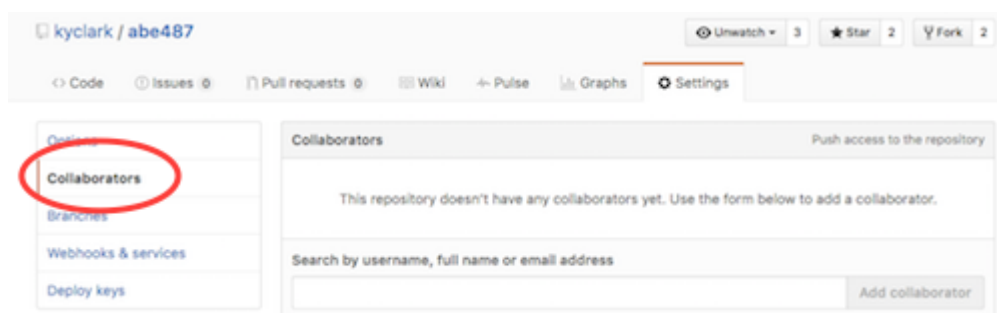

Step 5.

Click on "Settings"

Step 6.

Click on "Collaborators" on the left (confirm password if prompted).

Step 7.

Enter "kyclark" and hit "Add collaborator" so that I can make changes to your code.
